

SchlixX Plus honoured for sustainability

Top-class jury awards OASE prize for environmental technology

OASE receives the German Award for Sustainability from the German Institute for Service Quality for SchlixX Plus. Under the patronage of Dr Brigitte Zypries and B.A.U.M. Chairperson Yvonne Zwick, the jury selected OASIS as one of three award winners.

Hörstel/Berlin.

A top-class jury from the worlds of industry, science and the media, chaired by Yvonne Zwick, Chairperson of B.A.U.M. e.V., presented the „German Award for Sustainability“ on July 17, 2021. OASE was one of the recipients for its product SchlixX Plus, a sustainable solution for biologically stimulated sludge removal. The award recognises outstanding projects with a focus on the United Nations' sustainable development goals in the areas of people, planet, prosperity, peace and partnership. „The award confirms our commitment to developing and promoting environmentally sustainable and economically viable solutions for water therapy,“ said OASE CEO Thorsten Muck on receipt of the award.

The innovative way in which SchlixX Plus works lies in its clever combination of phosphate binding, microbial sludge decomposition and oxygen release. Already successfully applied in several types of water, it is currently being used in a pilot project for sustainable sediment decomposition in Schleswig-Holstein with the long-term goal of reducing the sludge in the Baltic Sea estuary of Schlei and improving the water quality. „With SchlixX Plus, OASE is offering a gentle and cost-effective alternative to the only other method to date, dredging, which would result in the removal, dumping and, beforehand, pollution of the water. This is suitable for almost every inland water body,“ adds Muck.

The jury evidently took a similar view, which is why it paid due tribute to the product development and the associated sustainable commitment in this disruptive approach.

About DISQ Deutsche Institut für Service-Quality (the German Institute for Service Quality):

The market research institute aims to improve service in Germany. Since 2006, the DISQ has been carrying out competitive analyses on behalf of the media, publishing more than 1000 studies and awards to date. DISQ has reviewed around 5000 companies as part of more than 300,000 tester interactions and the collection of more than 1 million customer opinions.

About the news channel ntv:

Germany's first news channel has been offering its viewers the latest news from politics, business, sports and society around the clock since 1992. The station's mission is to provide orientation – reliably, competently and quickly. That's why more than five million viewers tune in to ntv every day. Around 12 million visitors use the digital services every month.

About DUP UNTERNEHMER:

The leading medium for digital and climate transformation, edited by former Federal Minister Brigitte Zypries, has a total circulation of over 280,000 copies and is available at newsstands, as in-flight copies at airports, and as a supplement in „Handelsblatt“ and „WirtschaftsWoche“. About 1.3 million readers are reached via the magazine, the website dup-magazin.de and various newsletters.
